

Elements	Parameter	Unit	Value
			HC 468 15   25
	Sound power level	dB	73
	Sound pressure 7/10m	dB	46 / 44

<b>Dimensions</b>	Length x Width x Height	l x w x h	mm	1886 x 1200 x 1624
	<b>Weight</b>		kg	1039 - 1044

Weight specifications include the weight of the vacuum unit!

### Application

**Construction Industry - General Industry - Municipalities**

**For pumping groundwater**

### HC Whisper SL

The vacuum unit and components installed inside are easy to maintain. This requirement is ensured by wide-opening and lockable doors.

The external dimensions allow two machines to be transported side by side on the loading area of a lorry.

### Function and structure

This sound-insulating housing is designed as a full enclosure for HÜDIG HC 468 series electric vacuum units. The hot-dip galvanised steel frame is solid and stackable (up to three units can be stored on top of each other to save space). The unit has a forklift attachment and a central lifting eye for safe transport. The sound power level is 73 dB. The calculated sound pressure levels at 7m and 10m are: 46 dB(A) / 44 dB(A).
