

Technical Data

Transport Box TK 1800

	Parameter	Unit	Value
Dimensions	Length	mm	1.000
	Width	mm	1.800
	Height	mm	960
	Net weight	kg	155
	Max. load	kg	350
	Three-point mounting	-	Category 2

Application

in agriculture - forestry – industry

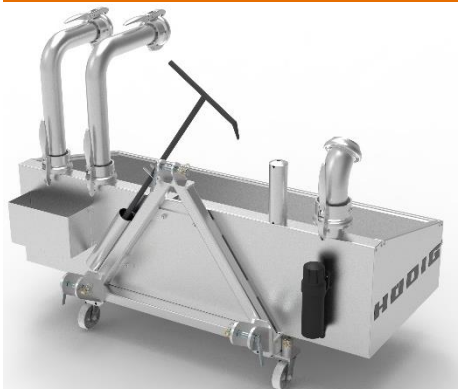

- Agricultural irrigation
- Forestry work
- Contract work, to take along consumables, tools, etc.

Standard Features

- All-round closed, sturdy storage box made of sheet steel for storing various irrigation accessories
- Ergonomic design geometry for easy storage, even of longer supply hoses
- Fully galvanised design for optimum corrosion resistance even in harsh applications
- Removable transport rollers for convenient attachment to and removal from the tractor
- Three-point hitch of category 2
- 4 mounting options outside the tank for hydrant connection bends, mobile water meters, SK bends, seals, etc.
- Easily accessible transport sleeve for a hydrant spanner
- Document box for neat storage of operating instructions, spare nozzles, etc.

Features

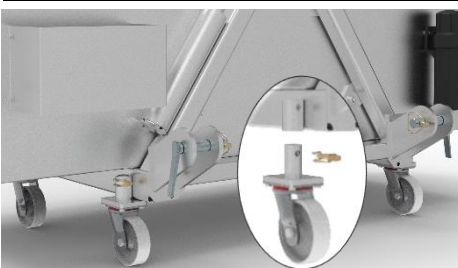

Storage Options

In addition to the storage option for accessories in the fully galvanised, large storage box, other frequently used items such as hydrant connection bends or mobile water meters can be carried directly on the frame on special mounting tubes. A hydrant spanner can also be stowed safely and quickly accessible in a transport sleeve at the rear of the crate.

There is an additional, smaller storage box on the rear wall for other small items, such as Storz spanners.

Transport rollers

The transport box is supplied with removable transport rollers for quick and easy attachment to and removal from the tractor. These 4 transport rollers can be easily removed for a higher drive-through height in existing buildings.

Mobile Diesel Tank

The transport box can optionally be equipped with a mobile diesel tank with a capacity of 200 litres. This tank is equipped as standard with a 12V DC pump and an automatic fuelling nozzle.
